

Deadline of Submission of Comments: 25-Sep-23

Document Number: ANSI/ASB Std 169

Document Title: Standard for Clinical Veterinary Forensic Examination

| # | Section | Type of Comment (E-Editorial, T-Technical) | Comments | Proposed Resolution | Final Resolution |
|---|----------|--|--|---------------------|---|
| 1 | 4.2.8 b) | E | should start with "evaluate" (not "evaluation of"), to be linguistically parallel with other items in the list (i.e. evaluate, collect, document...) | | Accept |
| 2 | 4.5.2 | E | eliminate the commas between "information" and "generated" and "received" and "shall." ["All information generated or received shall be documented and maintained in the clinician's case file, including, but not limited to"] | | Accept. CB confirms that the removal of the commas does not change the meaning of the sentence. |
